TO FLOORING FOR...**

HOTEL ENVIRONMENTS

WHY SPECIFY RESIN FLOOR SOLUTIONS

FOR HOTEL ENVIRONMENTS?

How a customer feels, both physically and psychologically when entering a hotel is of paramount importance to hotel owners and interior designers. It's not just about colour, texture and decoration, elements such as building materials, layout, space distribution, and lighting can have a big influence on creating a welcoming, inspiring design space that has a positive impact on the bottom line.

It might often be overlooked, but the floor offers interior designers the second largest platform or surface within an interior scheme to make a bold design statement. With a little imagination, floors can become much more than something to walk on, they can be a canvas from which to project brand personality.

Innovations in technology combined with changing design trends have seen the introduction of a wide variety of synthetic flooring materials brought to market. Vibrantly coloured, high-gloss epoxy resins, decorative terrazzo containing a variety of aggregate chippings, natural and coloured stone carpet systems as well as decorative flake and quartz based systems are just some of the hard floor options available to commercial clients.

Not only do these systems take advantage of a wide range of materials and design processes they offer clients a robust performance that matches up to the operational requirements of the space involved including heavy footfall, dirt and spillage as well as slip and scratch resistance.

BENEFITS OF RESIN FLOORING

Lifecycle Costing:

Durable resin flooring systems reduce the frequency of repairs or need for replacement.

Decorative Finishes:

Resin flooring can be installed in a variety of finishes, colours, textures and patterns.

Hygienic:

Seamless resin flooring is easy to clean and available with antimicrobial additives.

Protection:

Protects the substrate against chemicals, abrasive conditions and water ingress.

Safety & Slip Resistance:

Aggregates provide a positively textured finish for pool surrounds.
