

MULTICOLOR STONEFACE® COATING

► An easy-to-apply decorative coating that creates a granular pattern on cementitious masonry, wood, glass, plastic and metal.

Multicolor Stoneface® Coating Solutions from Cathay Coating

Multicolor Stoneface® technology, unlike standard homogeneous coatings, contains different coloured liquid beads dispersed within a resin matrix which yields a multicolour pattern using a spray application technique.

The Multicolor Stoneface[®] range creates a granular pattern without the addition of aggregate, filler, or minerals, which emulates natural stone textures such as granite and marble, providing an easy to apply, cost effective alternative to popular building facade finishing materials.

Multicolor Stoneface® coating is suitable for all types of interior and exterior building facade, including cementitious masonary, wood, glass, plastic and metal. It is also suitable for re-coating on ceramic tile, granite/marble or previously painted surfaces.

Benefits

UV Resistant, suitable for interior and exterior application

Long term water resistance to protect against ingress

Low viscosity formulation ensures quick cure times and low material consumption

Freeze-thaw resistant

Excellent adhesion for longer lifecycles

Easy to apply and suitable for renovation projects

Excellent low/high temperature resistance, suitable for all climates

Easy to clean and maintain, providing a long-lasting finish

Low VOC and odour, environmentally friendly

Application Suitability

Exterior Interior

Application

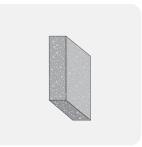

Apply an Adhesion Primer

2. Locate the Groove Line

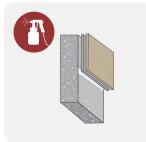

3.Paint the Groove Line

4. Masking Tape over the Groove Line

5. Apply a Textured Undercoat

6. Apply Multicolor Stoneface®

7. Remove the Masking Tape

8. Apply a Clear Top Coat

Why Choose Multicolor Stoneface®?

Multicoloured Architectual Surface Coating

An economical and quick to apply decorative coating system that provides a granular pattern for architectural surfaces. Available in a wide range of colours and textures.

Interior/Exterior and Refurbishments

Combines inorganic pigments and a high performance polymer formulation to achieve a high quality, weather resistant, colour stable surface coating.

Spray Application

Consistent multicoloured pattern produced instantaneously by a simple-spray application with all-colours-in-one-component formulation. Low material consumption, quick dry times and easy maintenance.

Environmentally Friendly Option for Green Buildings

A non-toxic, low VOC and lightweight alternative to traditional granite cladding options.
