HELLO

THE BIG INTRODUCTION

Welcome to Flowcrete – a market-leading manufacturer of quality commercial resin flooring products and sub-floor systems that are simply bursting with enhanced features to bring education environments the very best in performance flooring technology...

At Flowcrete we pride ourselves on being able to offer the correct flooring solution, no matter what the surface requirements or service conditions of your environment.

the Floorzone Solution – meaning that you'll receive a range of flooring materials for the different areas and levels of your construction project – all from one quality supplier.

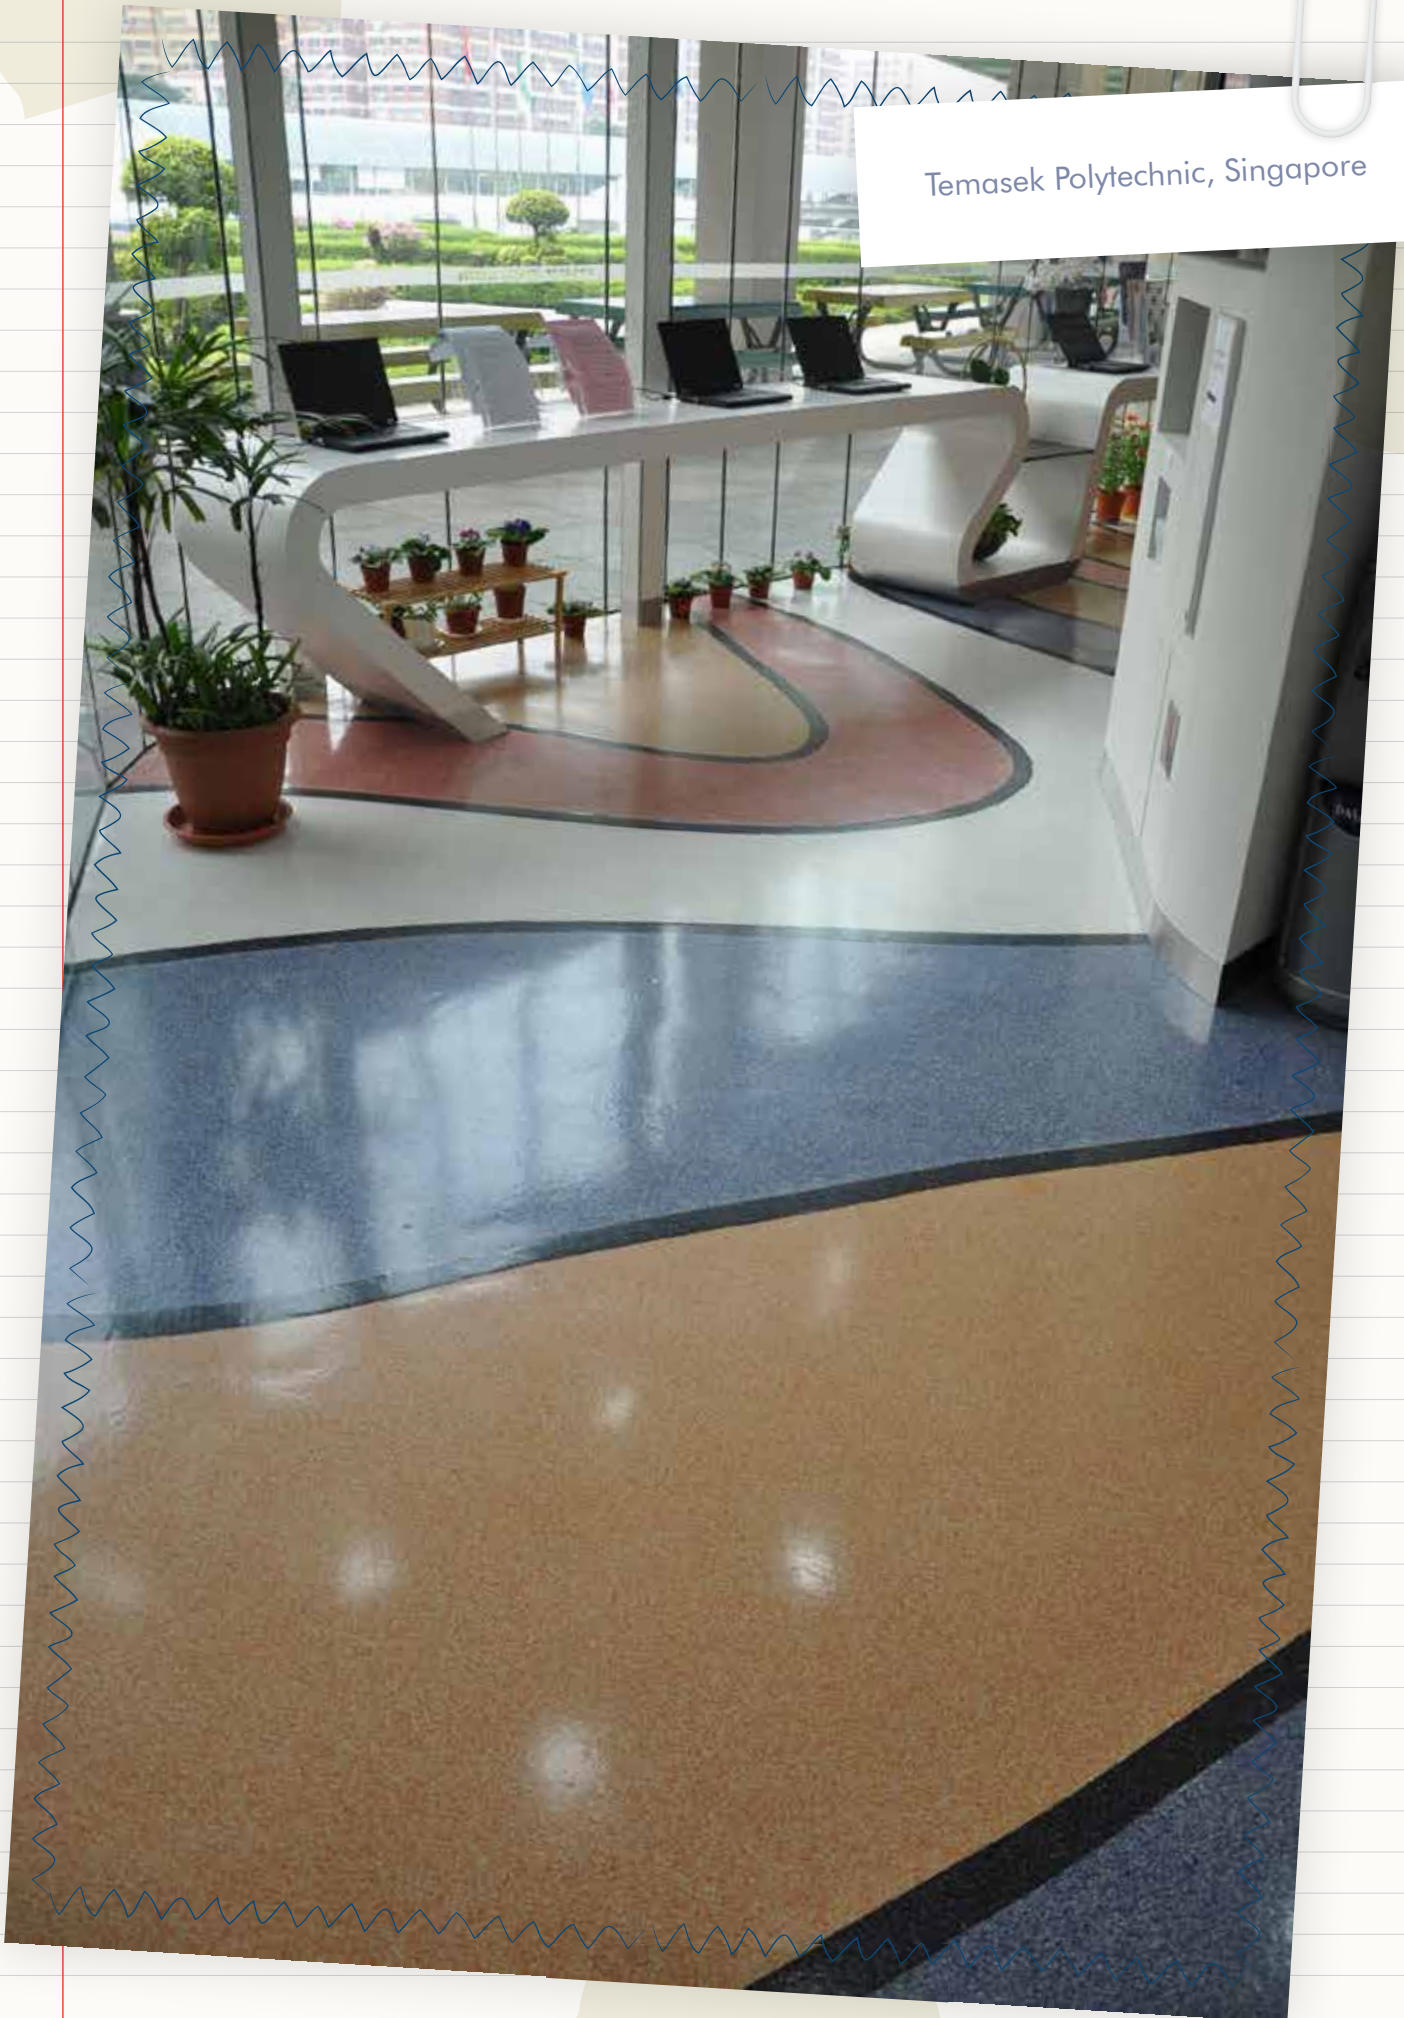

We've got a huge range of resin flooring formulations from high strength polyurethane coatings and ultra-gloss epoxy floor finishes through to car park coatings, and floor screeds... you name it, we've got it!

And it doesn't stop there... at Flowcrete, we have a team of flooring scientists working behind the scenes to develop eco-friendly flooring formulations that exceed industry guidelines for environmental stewardship and an army of flooring experts across Asia Pacific who are on hand to ensure a flawless finish to your project.

What's more, to cater for the complete floor build-up, we'll happily combine these into one package for you – something we like to call

FOR THE WORLD
AT YOUR FEET

Temasek Polytechnic, Singapore

THE BIG MESSAGE

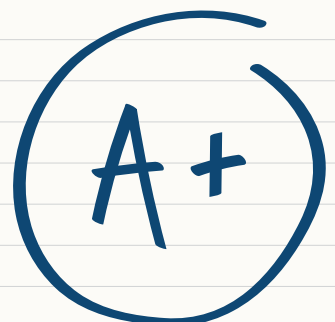

At Flowcrete we understand that the education of our children is a BIG deal and that creative, inspiring and vibrant learning environments can go a long way to helping them put their best foot forward.

In order to ensure the next generation set off on a good footing, Flowcrete provides a BIG range of decorative and durable resin floor coverings and sub-floor systems, which have been designed to make a BIG impact on the ground.

From classrooms to kitchens,
sports halls to stairwells and
libraries to laboratories – we offer
the right flooring solution for
each and every teaching space
within the school environment,
no matter how BIG or small.

Creating the perfect learning
environment requires BIG design
ideas and we believe that we can
help make that happen, giving young
students the world at their feet...

↖ good

THE BIG IDEA

At Flowcrete, we've been inspired by recent innovations in the construction industry to simplify the procurement process involved in developing new state-of-the-art primary and secondary schools, as well as further education facilities, across Asia Pacific.

We've been racking our brains at Flowcrete HQ, wondering just how we could get involved and help the process too.

The answer was simple – it came to us like a bolt of lightning - to develop a package that would consolidate the entire flooring needs of any new-build school development, from substrate to finish, and deliver it to the client under one manufacturer's warranty.

The Floorzone Solution, as we have ingeniously named it, is a state-of-the art flooring package that includes a decorative resin floor finish, an Isocrete floor screed and a sound-proofing acoustic foam layer – what more could you ask for?

Can include
UP TO

THE BIG FLOOR PLAN

Across the school building, you'll find a wide range of teaching spaces, service corridors and maintenance zones not to mention outdoor areas and specialist on-site facilities — each of which have their own flooring requirements...

ADD A FLOOR FINISH TO YOUR SCREED

	EXTERNAL WALKWAYS Rustik UV, Deckshield LBD		SPORTS HALLS FlowSport
	CAR PARKS Deckshield LBD, Deckshield ID		COMMUNAL AREAS Mondéco, Peran SL
	GENERAL TEACHING AREAS Peran Comfort, Flowfast Terrosso		DINING AREAS Flowfast Quartz Classic, Flowshield Quartz
	WORKSHOPS / LABS Flowshield Quartz, Flowtex TQ/QC		KITCHENS Flowfresh RT, Flowfresh HF, Flowfresh SRQ
	TOILETS & CHANGING ROOMS Flowshield Quartz, Flowtex TQ/QC		MAINTENANCE & STORAGE Flowcoat SF41

THE BIG PICTURES

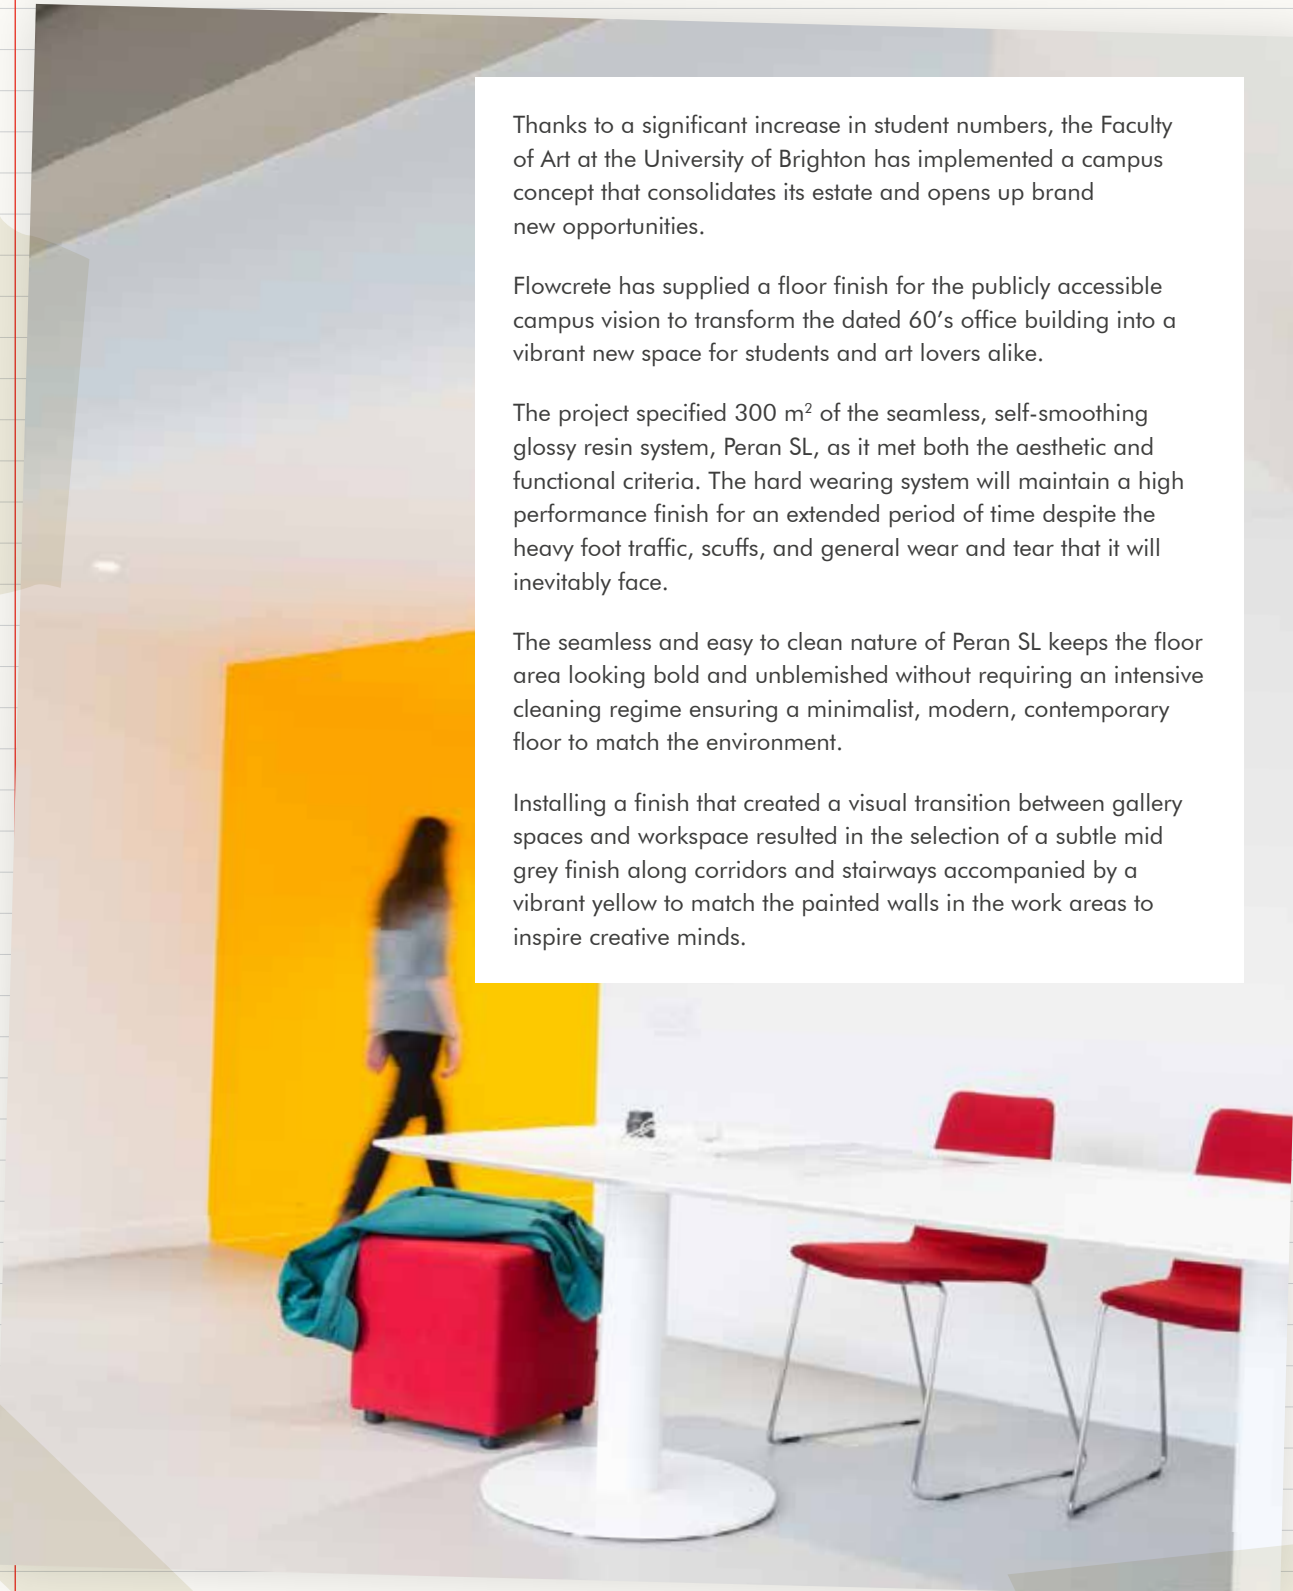

Thanks to a significant increase in student numbers, the Faculty of Art at the University of Brighton has implemented a campus concept that consolidates its estate and opens up brand new opportunities.

Flowcrete has supplied a floor finish for the publicly accessible campus vision to transform the dated 60's office building into a vibrant new space for students and art lovers alike.

The project specified 300 m² of the seamless, self-smoothing glossy resin system, Peran SL, as it met both the aesthetic and functional criteria. The hard wearing system will maintain a high performance finish for an extended period of time despite the heavy foot traffic, scuffs, and general wear and tear that it will inevitably face.

The seamless and easy to clean nature of Peran SL keeps the floor area looking bold and unblemished without requiring an intensive cleaning regime ensuring a minimalist, modern, contemporary floor to match the environment.

Installing a finish that created a visual transition between gallery spaces and workspace resulted in the selection of a subtle mid grey finish along corridors and stairways accompanied by a vibrant yellow to match the painted walls in the work areas to inspire creative minds.

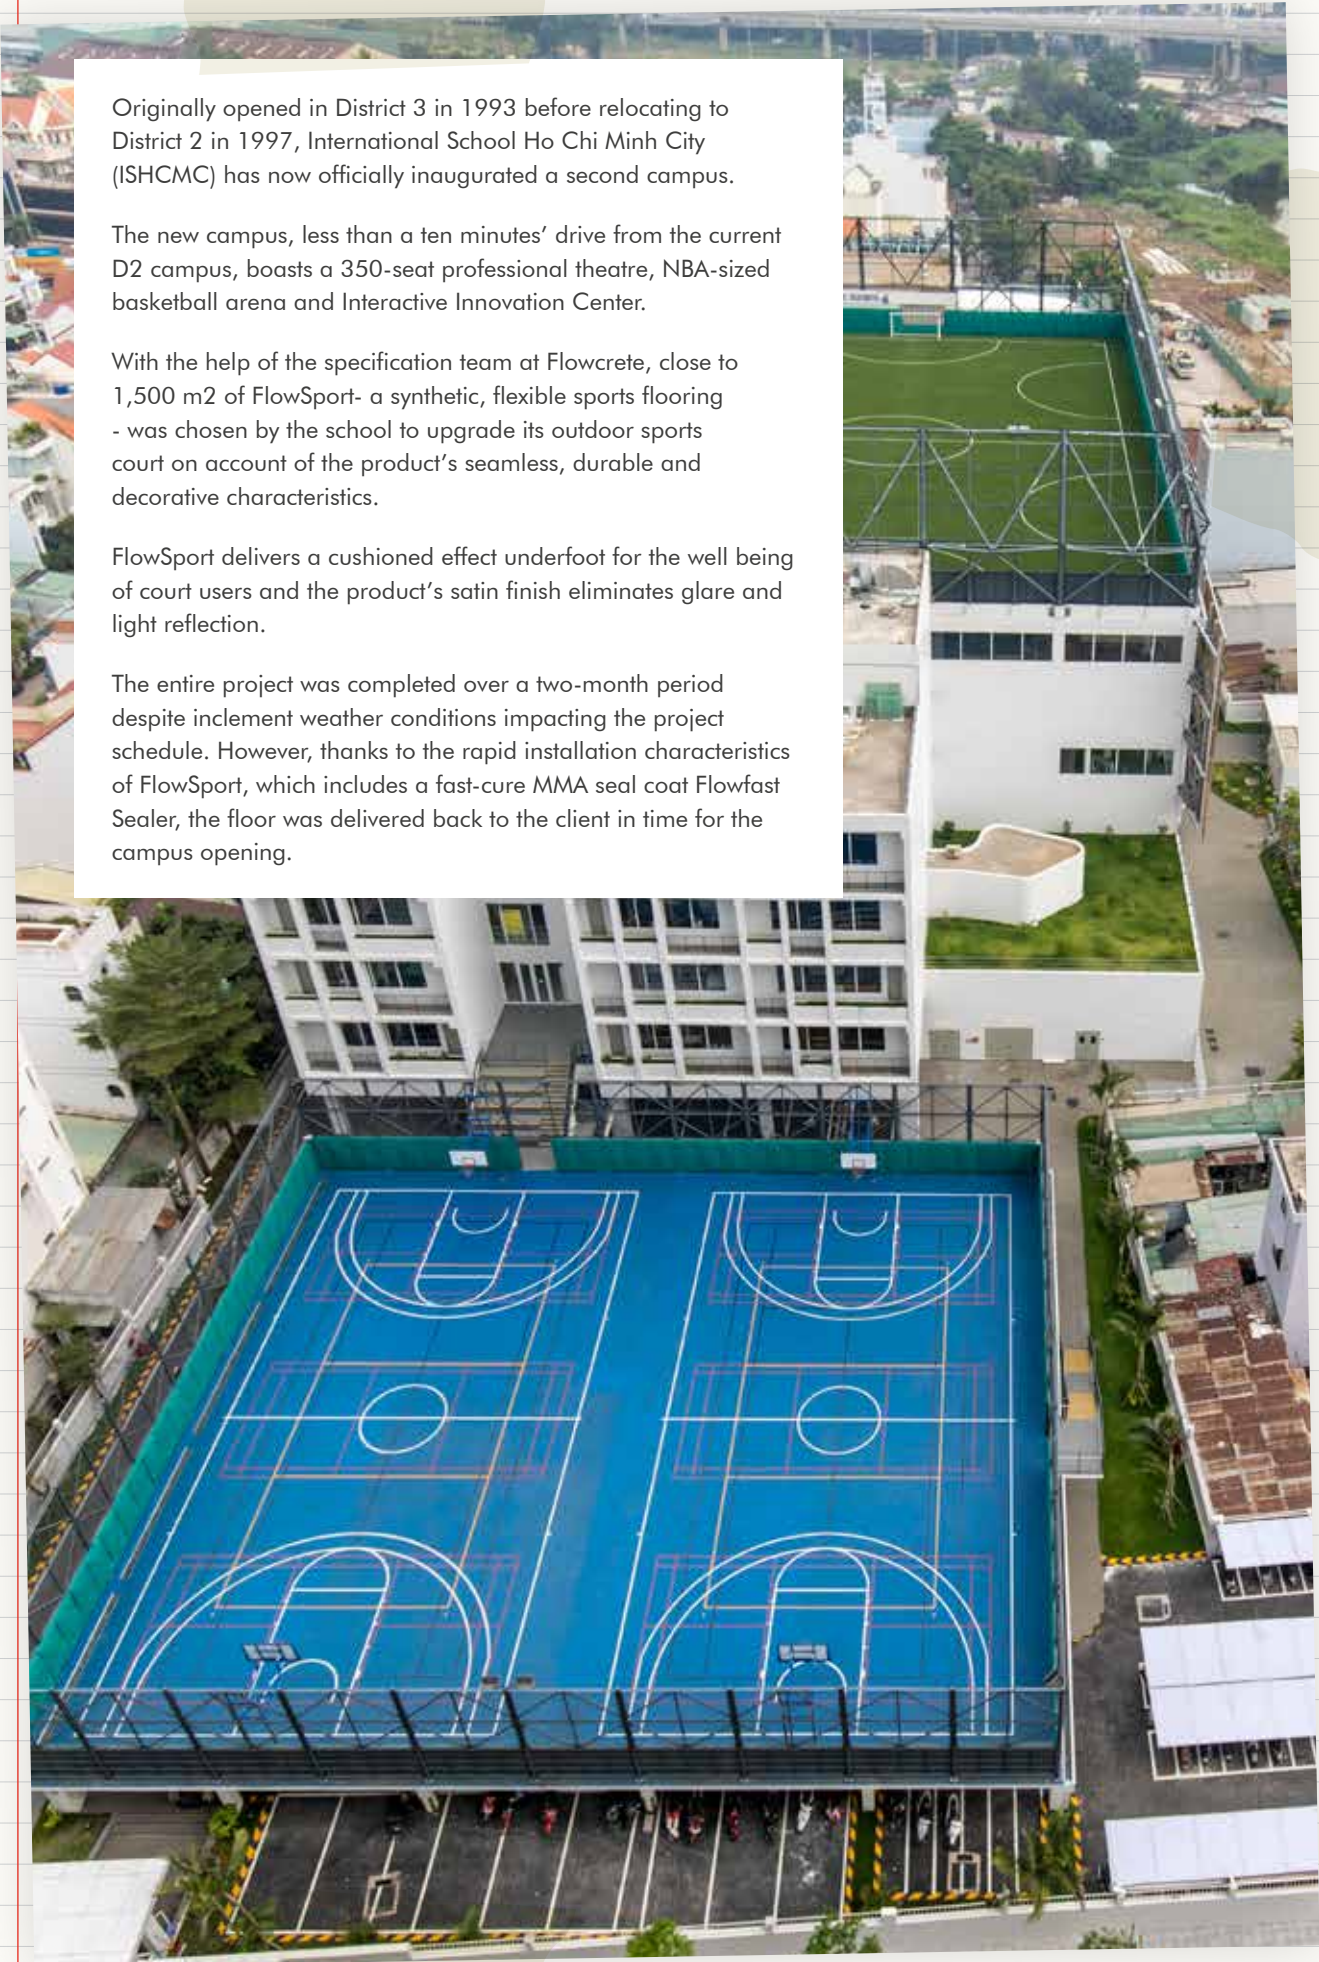

Originally opened in District 3 in 1993 before relocating to District 2 in 1997, International School Ho Chi Minh City (ISHCMC) has now officially inaugurated a second campus.

The new campus, less than a ten minutes' drive from the current D2 campus, boasts a 350-seat professional theatre, NBA-sized basketball arena and Interactive Innovation Center.

With the help of the specification team at Flowcrete, close to 1,500 m2 of FlowSport- a synthetic, flexible sports flooring - was chosen by the school to upgrade its outdoor sports court on account of the product's seamless, durable and decorative characteristics.

FlowSport delivers a cushioned effect underfoot for the well being of court users and the product's satin finish eliminates glare and light reflection.

The entire project was completed over a two-month period despite inclement weather conditions impacting the project schedule. However, thanks to the rapid installation characteristics of FlowSport, which includes a fast-cure MMA seal coat Flowfast Sealer, the floor was delivered back to the client in time for the campus opening.
