

Flowcoat PU

A hard wearing, UV light colour stable, polyurethane based floor coating available in a smooth or antislip finish.

Used as an industrial floor coating in factories, warehouses, plant rooms and storage areas.

Good Abrasion Resistance:

Provides a high strength coating for high traffic industrial facilities.

Good Chemical Resistance: Protects against a range of chemicals used in processing areas.

UV Light Stable:

100% UV light stable and does not yellow over time.

Hygienic & Easy to Clean:

The seamless and gloss finish allows the system to be cleaned easily.

Excellent Bond Strength

Bonds extremely well to concrete and screed substrates.

Forest Green	Tile Red	Warm Grey	Goosewing Grey
Light Blue	Ocean Blue	Dark Grey	Black

The applied colours may differ from the examples shown.

For a full colour chart and samples, contact your local Flowcrete office.

Technical Profile*				
FIRE RESISTANCE				
EN 13501-1	B _{fl} - s1			
SLIP RESISTANCE**				
Method described in BS 7976-2 (typical values for 4-S rubber slider)	Dry>40, Wet depends on specification (in accordance with HSE and UKSRG guidelines)			
THERMAL RESISTANCE				
Softens over 70°C, hardens on co	oling			
WATER PERMEABILITY				
Nil – Karsten test (impermeable)				
CHEMICAL RESISTANCE				
Contact technical department				
ABRASION RESISTANCE				
Taber Abrader (1 kg load using CS17 wheels)	46 mg los	s per 1000 c	cycles	
RESISTANCE TO CHLORIDE ION	S			
DOT BD47/94: Appendix B, Chloride ions Method B4,2(d)	No chlorid 28 days	e ion penetr	ation after	
BOND STRENGTH				
Greater than cohesive strength of	25 N/mm ² c	oncrete. >1	.5 MPa	
SPEED OF CURE		20°C	30°C	
Light Traffic		18 h	12 h	
Full Traffic		48 h	24 h	
Full Chemical Cure		7 d	6 d	

 * These figures are typical properties achieved in laboratory tests at 20°C and at 50% Relative Humidity.

**The slipperiness of flooring materials can change significantly, due to the installation process, after short periods of use, due to inappropriate maintenance, longer-term wear and/or surface contaminants (wet or dry). Textured systems are recommended to meet slip resistance value requirements for wet conditions and/ or surface contaminants (wet or dry) - please contact our Technical Advisors for further details and specifications.

Model Specification

System	Flowcoat PU
Finish	Gloss
Thickness	Dependent on specification
Manufacturer	Flowcrete Asia

Preparatory work and application in accordance with manufacturer's instructions.

System Design

Products Included In This System

Primer	Flowcoat PU Primer	
Body Coat	Flowcoat PU Finish	
Finishing Coat	Flowcoat PU Topcoat	

For actual coverage rates, refer to the appropriate project specification.

Detailed application instructions are available upon request.

Substrate Requirements

Concrete or screed substrate should be a minimum of 25N/mm², free from laitance, dust and other contamination. The substrate should be dry up to 75% RH as per BS8204 and free from rising damp and ground water pressure.

Installation Service

The installation should be carried out by a licensed contractor with a documented quality assurance scheme. For details of our licensed contractors, contact our customer service team or enquire via our website at www.flowcreteasia.com

Environmental Considerations

The finished system is assessed as non-hazardous to health and the environment. The long service life and seamless surface reduce the need for repairs, maintenance and cleaning. Environmental and health considerations are controlled during manufacture and application of the products by Flowcrete staff and fully trained and experienced contractors.

Aftercare, Cleaning & Maintenance

Clean regularly using a single or double headed rotary scrubber drier in conjunction with a mildly alkaline detergent.

Important Note

Flowcrete products are guaranteed against defective materials and manufacture and are sold subject to our standard 'Warranty, Terms and Conditions of Sale', copies of which can be obtained on request. Warranty does not cover suitability, fit for purpose or any consequential or related damages.

Further Information

To ensure you are specifying a fit-for-purpose floor, please consult our Technical Advisors or visit our website to register your interest in specifying one of the most durable floors on the market.

1. Light colours may require additional coats to achieve desired results 2. It is recommended that top coat colours are close to base coats colours to achieve desired results 3. This product is not UV stable and may discolour unless otherwise stated 4. System Data Sheet to be read in conjunction with Method Statement and Product data Sheets.
